

Dear MTN,

I am writing to express my sincere interest in your esteemed organization's scholarship program. My name is Calvin Akiweley Chaluatera, and I am a determined and ambitious individual who is deeply passionate about Information Technology (I.T.) and making a positive impact in my community.

Despite not being born into wealth, my widowed mother fought hard to support my education after my father's untimely passing when I was just six years old. As a result, I took my education very seriously from a young age.

Growing up, I developed a profound fascination with technology. Even though I didn't have access to computers at home, I eagerly sought opportunities to immerse myself in everything related to I.T. I surrounded myself with friends who had access to computers, determined to learn as much as I could.

This passion for technology led me to pursue my dream program: BSc. Information Technology at the University of Energy and Natural Resources. Throughout my university journey, I've remained dedicated to my studies, resulting in consistently strong academic performance.

In terms of my professional aspirations, I'm currently focused on application and web development. I've been diligently learning HTML, CSS, and JavaScript for web development, as well as gaining proficiency in C++ for computer applications. Additionally, I've developed a keen interest in video editing, gaining experience with software such as Filmora-X, Adobe Premiere Pro, and Capcut. In essence, I am deeply passionate about becoming a proficient video editor and software developer.

However, my ambitions are hindered by the limitations of my low-end laptop, which struggles to run the necessary software for my studies and projects. Despite this challenge, I remain undeterred in my pursuit of my dreams, often borrowing friends' computers to continue my work.

Beyond my educational and professional goals, I have a strong desire to give back to my community, particularly to children in the Northern region. Having witnessed firsthand the challenges they face, including limited access to education, food, and shelter, I am driven by a deep sense of responsibility to help them. During my vacations, I volunteer my time to teach ICT skills to children in local schools, many of whom have never seen a computer before. The joy and gratitude they express motivate me even further to work hard and achieve my goals, with the ultimate aim of making a positive impact on society.

With all this in mind, I humbly request your esteemed organization's consideration for a scholarship. Such support would not only alleviate the financial burden of my education but also enable me to pursue my career aspirations and continue my efforts to give back to my community.

Thank you for considering my application. I am eager for the opportunity to contribute to the world of technology and to make a meaningful difference in the lives of others.

Sincerely,

Calvin Akiweley Chaluatera.
